

## Releasing Spear

AEI's Releasing Spear offers a durable solution for engaging and retrieving internal fish from the well without damaging them. Its robust construction can withstand severe jarring and pulling strains. The spear's design ensures that no small parts are lost or damaged during operation. It can also be used with other equipment, such as pack-off assemblies and internal cutters. In case the fish cannot be pulled, the spear can be quickly released and disengaged for easy retrieval.

The Releasing Spear includes a mandrel, grapple, releasing ring, and bull nose nut. The mandrel is available in flush or shoulder type, made of high-strength alloy steel and designed to match customer specifications for size and upper box connection type.

Model	Nut O.D. (mm)	Catch size (in)	I.D (mm)
LM-T48	35	1.9	8
LM-T60	45	2 3/8	8
LM-T73	54	2 7/8	10
LM-T89	66	3 1/2	10
