

Internal & External Hooks

An **Internal hook** is a fishing tool employed to retrieve various types of fish, such as wireline, cable, logging wireline, and paraffin cutler, from inside oil tubes or casings. It is available in diverse structures based on the specific fish to be caught, with dead hook and live hook types being the two most common variations.

Internal Hook

Model	O.D.(mm)	Connection	For Casing/Tubing Size(in)
NG70	70	2 3/8 PAC	3 1/2
NG90	90	NC26	4 1/2
NG110	110	NC31	5 1/2
NG136	136	NC31	6 5/8
NG150	150	NC38	7
NG176	176	NC38	8 5/8
NG190	190	NC38	9 5/8

The **External Hook** is a tool utilized within casings and tubing to retrieve various items such as ropes, lifting bails, short cylinders, short rope slings, logging steel pieces, cables, and more. Its primary function is to catch or hook onto these materials for removal from the wellbore.

Model	O.D.(mm)	Connection	For Casing/Tubing Size(in)
WG70	70	2 3/8 PAC	3 1/2
WG90	90	NC26	4 1/2
WG110	110	NC31	5 1/2
WG136	136	NC31	6 5/8
WG150	150	NC38	7
WG176	176	NC38	8 5/8
WG190	190	NC38	9 5/8
