

Series 10 & 20 Overshot

AEI's Series 10 Sucker Rod Overshot is a professional fishing tool, designed for engaging and retrieving sucker rods, couplings, and other tubular from inside tubing strings.

AEI's Series 10 Sucker Rod Overshot is composed of a Top Sub, Bowl, Grapple, and Guide.

Depending on the fish size, two grapple options are available, Basket Grapple and Spiral Grapple. This tool is user-friendly and straightforward to operate during both engaging and releasing operations. Simply rotating the fishing string to the right-hand side is all that is required.

To Engage a Fish:

Carefully lower the overshot over the fish while slowly rotating it to the right. When the overshot reaches the top of the fish, the right-hand torque will engage the fish. Release the right-hand torque from the fishing string and pull it upward to raise the fish.

To Release a Fish:

To break the grapple hold within the bowl, gently bump down or drop the weight of the fishing string against the Overshot. While gradually rotating it to the right, lift the fishing string until the Overshot has cleared the fish.

Max.Catch Size(Spiral Grapple) (mm)	27	38.1	41.3	44.5	49.2	46	50.8	60.3
