

## Taper Tap

The taper tap is a useful tool for creating threads in tubular dropped objects such as drill pipe and tubing, particularly when dealing with union connections. Equipped with either left- or right-hand thread drill pipes and tools, it can be utilized for various fishing operations. These taps are made from high-strength alloy steel forging materials and heat-treated and feature a chip groove for efficient threading.

Taper Tap

Model	Large wicker O.D. (mm)	Small wicker O.D. (mm)	ID (mm)	O.D.(mm)	Catch Size(in)
GZ47×28-NC26	47	28	10	86	1.9 Tubing
